

LARAVEL ASSESSMENT

Task Manager

- 1. User Management:**
 - a. Implement a role-based access control system with at least two roles: regular users and administrators.**
 - b. Regular users can create, edit, and delete their tasks.**
 - c. Administrators can manage all tasks and users.**
- 2. Task Priority and Categories:**
 - a. Add the ability to assign priorities to tasks (e.g., low, medium, high).**
 - b. Implement task categories to help organize tasks (e.g., work, personal).**
- 3. Task Comments and Attachments:**
 - a. Users should be able to leave comments on tasks to discuss details or updates.**
 - b. Allow the attachment of files to tasks.**
- 4. Task Search and Filtering:**
 - a. Implement a robust search functionality allowing users to search tasks by title, category, priority, due date, etc.**
 - b. Provide filtering options, such as viewing tasks by priority or category.**
- 5. Collaboration:**
 - a. Allow users to collaborate on tasks, assigning tasks to multiple users and showing shared tasks on each user's dashboard.**
- 6. To persist data use MySQL Database**

Make sure to submit before the deadline otherwise assessment will be declined.

Development Related Instruction

- **Use any CSS framework like (bootstrap, tailwind)**
- **Use JQuery for any script**
